

the school of Coloropoli

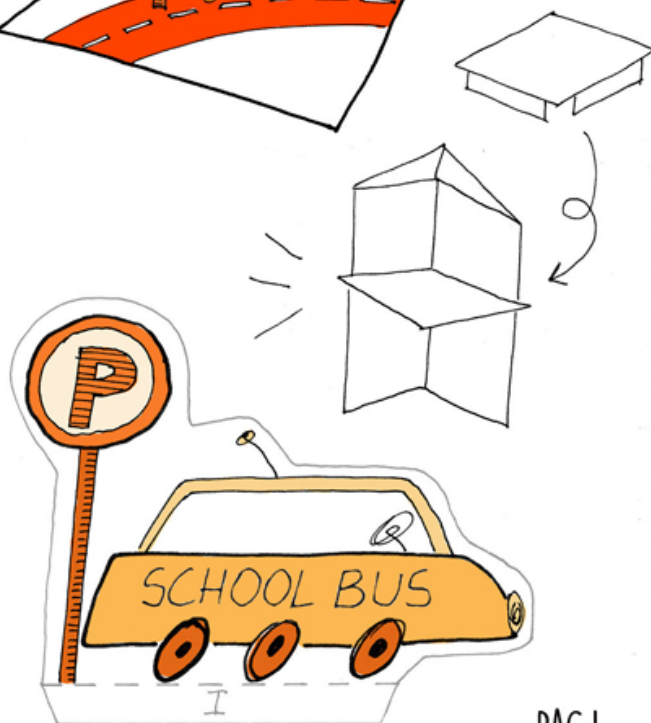

Here is the school of Coloropoli!

Since it is very important to know everything about colors, the school changes color every year, and subjects too. This year we're studying:
the geography of the **GRAPEFRUIT** satellite,
the chemistry of **CARROT CAKES** (to make them super tall and soft),
the habits of the **FOX** and **CLOWN FISH**,
the works of famous painter **ORANGE-GIOTTO**
and the techniques for growing the famous **CHATTING PUMPKINS**.

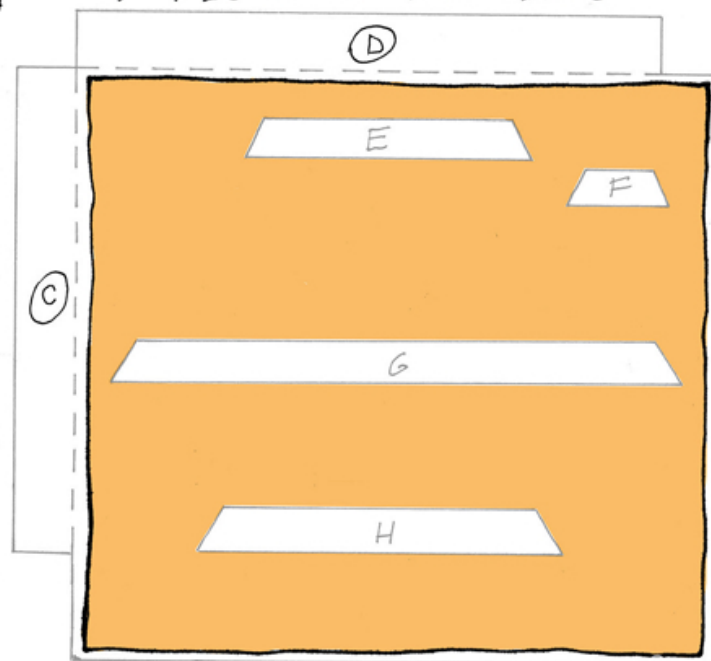

THAT'S MS. CLEMENTINE, THE TEACHER.
